WHAT IS IT?

- it's the biggest coral in the world
- it is located in northeast australia
- is under UNESCO protection
- main tourist spot

WHY IS THE CORAL REEF IMPORTANT ?

- It's home for the most of sea animals for example : fish, crustaceans, sharks, turtles,....
- oxygenates the air in the sea
- in medicine for the production of new medicines
- they help protect the coast against, for example, storms or big waves

WHY IS THE CORAL REEF DIEING?

- climate change
- ocean warming
- fishing stuff
- water pollution
- tourism
- crown-of-thorns

WHAT HAPPENS IF THE CORAL REEF DIE?

- worse quality water - they clean the ocean
- ecosystem destruction
- more floods and storms - because they protects the coast from waves
